

Project Initialization and Planning Phase

Date	10 July 2026
Team ID	xxxxxxxxxx
Project Name	Credit Card Approval Prediction
Maximum Marks	3 Marks

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps focus on what matters to create experiences people will love.

PS	Problem Statement (Customer)	I am / I'm trying to	But	Because	Which makes me feel
PS-1	A bank credit/fraud analyst reviewing incoming transactions.	Identify fraudulent transactions quickly among thousands of legitimate ones.	manual review is slow and reactive.	fraud patterns are subtle and hidden in dozens of anonymized numerical features.	overwhelmed and worried about missing real fraud or blocking genuine customers.
PS-2	A cardholder whose card was used for an unauthorized transaction.	Get charged only for purchases I actually made.	fraud is often detected after the money has already moved.	there's no real-time automated check at the moment of the transaction.	anxious about financial loss and trust in the bank.
PS-3	A compliance officer auditing suspicious transaction batches.	Screen large volumes of transactions for risk efficiently.	manually inspecting every transaction doesn't scale.	transaction volume can be in the hundreds of thousands per day.	under pressure to balance thoroughness with speed.
