

Demonstration of Proposed Features

Date: 10 July 2026

Team ID: xxxxxxxxxx

Project Name: Credit Card Approval Prediction

Maximum Marks: 1 Mark

S.No	Feature	Name	Status	Demonstrated	Description
Remarks			(Implemented/Partial/Pending)	(Yes/No)	
1	Data preprocessing & SMOTE balancing	Scales Time/Amount, balances Implemented classes the training set	on	Yes	Confirmed via classdistribution printout
2	Multi-model training & comparison	Trains Logistic Regression, Decision Tree, Random Forest, XGBoost	Implemented	Yes	Compared via Precision/Recall/F1/AUC
3	Best model auto-selection	Automatically selects the top F1-scoring model and saves it	Implemented	Yes	train_model.py saves best_model.pkl
4	Flask prediction form	Enter transaction features, get instant Fraud/Genuine prediction Displays fraud	Implemented	Yes	Verified locally at 127.0.0.1:5000
5	Prediction probability confidence alongside score prediction	the Implemented		Yes	Returned in the /predict JSON response
6	IBM Watson ML	Pushes trained model to a hosted, scalable Partial deployment scoring endpoint		No	Script ready; live deployment pending IBM Cloud credentials

Feature Implementation Summary

Metric	Value
Total Features Proposed	6
Total Features Implemented	5
Total Features Demonstrated	5
Overall Implementation Rate (%)	83%
