

Project	Demo	Planning											
Date:	10	July	2026	Team	ID:	xxxxxxxxxx	Project	Name:	Credit	Card	Approval	Prediction	
Maximum		Marks:	1	Mark									
S.No		Demo		Section		Description (mins)			Duration		Responsible		Member
1			Introduction & Problem Statement		Explain why fraud detection is hard at scale (class imbalance, transaction volume)			2		Guvvala Srinidi			
			Dataset Overview		Walk through the ULB Credit Card Fraud dataset and its class distribution			2		Modem Indu Sekar			
3			Model Training & Comparison		Show precision/recall/F1/AUC across the four algorithms			3 results		Guvvala Srinidi			
			Live		Flask	App	Demo	Submit a sample transaction and show 3 the Fraud/Genuine prediction			Jeevitha varadha raju		
5			Deployment Overview		Explain the IBM Watson ML deployment pipeline			2		Mulakkayala Sujan			
6			Q&A Session		Answer evaluator questions			3		Avula Sujitha			

DemoFlow Summary

Step	Activity				Notes			
1	Introduction & Problem Statement				Set	context:	rare-event classification problem	
2	Solution Overview				Summarize	the	ML	pipeline and architecture
3	Live Feature Demonstration				Run	a	genuine and a fraudulent sample transaction through the app	
4	Q&A Session				Address	evaluator questions on	model choice and metrics
